Vellore Institute Of Technology Amaravati

B.tech Computer Science speciation in artificial intelligence and machine learning

Current CGPA : 8.65/10

May. 2021 – Aug 2025

Narayana Junior College, Poranki Vijayawada, Andhra Pradesh

Higher Secondary School

Obtained Marks : 889/1000

June. 2019 – May 2021

Narayana High School, Lawyer Pet Ongole, Andhra Pradesh

Secondary School

Obtained CGPA : 9.8/10

June. 2018 – Apr 2019

Summary

Aspiring **Machine Learning Engineer** and **Web Developer** with strong proficiency in **computer vision, deep learning, LLMs** and **data analysis** alongside expertise in Proven experience in developing innovative AI solutions, including a **product comment analysis system** and a **real-time car damage detection model**, as well as crafting **user-friendly web interfaces**. Passionate about delivering **performance-optimized, aesthetically appealing web solutions** and leveraging technical skills to create impactful AI and web applications.

Course Work

Artificial Intelligence | Machine Learning | Deep Learning | Reinforcement Learning | Natural Language Processing | Digital Image Processing | Web Development | Cloud Computing | DBMS | Data Structures and Algorithms | Responsive Design Principles | Front-End Development

Projects :-

Product Comment Analysis

- **Tools:** Flask, Groq API, TextBlob, OpenCV, JavaScript, HTML, CSS
- Designed a web application to analyze YouTube comments for product sentiment and summarization.
- Integrated Groq API for dynamic keyword generation and summarization of grouped comments.
- Built an intuitive interface for users to explore grouped comments with insightful visualizations.
- Implemented advanced comment filtering, translation of non-English comments, and sentiment analysis.
- Key achievements include identifying trends in product perception, providing actionable feedback to businesses.

Hand Gesture Recognition System

- **Tools:** OpenCV, CNNs, MediaPipe
- Created an interactive UI, leveraging JavaScript to integrate gestures with real-world applications.
- Integrated deep learning and JavaScript for intuitive user experiences in immersive applications.

Real World Subway Surfers Game:

- **Tools:** OpenCV, MediaPipe, Computer Vision
- Designed and implemented an innovative gaming experience by integrating real-world movement into "Subway Surfers."
- Utilised OpenCV and MediaPipe for accurate pose estimation from webcam input.
- Led game design and development efforts, resulting in a prototype showcasing unique gameplay.
- Highlighted the fusion of physical movement and virtual gaming to engage players.

Live Car Damage Detection System

- **Tools:** Python, YOLOv8, TensorFlow, Flask
- Developed a web-based application for real-time car damage detection, leveraging responsive front-end design principles.
- Integrated the model into a user-friendly interface using HTML, CSS, and basic JavaScript for interactivity.
- Enhanced model performance with data augmentation and transfer learning, achieving 80% detection accuracy.

Technical Skills

- **Languages:** Python, JavaScript, SQL, Git, GitHub
- **Web Development:** HTML, CSS, Webflow, Responsive Design
- **Frameworks/Libraries:** Flask, TensorFlow, PyTorch, OpenCV, MediaPipe
- **AI/ML:** Deep Learning (CNNs, YOLO), NLP (TextBlob, Sentiment Analysis), LLMs
- **Cloud & Tools:** AWS (Certified), Git, GitHub, Figma, Jupyter, VS Code

Experience & Achievements

- **Projects Department Head**, ML Club: Spearheaded development and showcased projects at technical events.
- **Core Member**, Vitopia: Organized non-technical events to enhance student engagement.
- **Certified AWS Cloud Practitioner**: Applied cloud principles to improve website performance and scalability.
